True custom solutions since 1965

Certificate of Flame Resistance

The fabric or substrate described below meets the minimum requirements of flame resistance established by the following tests:

- State of California – F-59901
- California Title 19
- NFPA 260A/UFAC Class 1
- CAN/ULS-S109- 03 Canadian flame test for fabrics
- British 5867: Part 2:1980
- NFPA 701 – Small Scale
- NFPA 701 – Test Method#1

The article described below is made from non-combustible fibers without the addition of flame retardant chemicals and is rated as Inherently and Permanently Flame Retardant (IFR) for the life of the fabric. **This flame resistance WILL NOT wash out.**

S&K Theatrical Draperies, however, recommend annual inspection and testing of the fabric using the NFPA 705 Field Test Method for Textiles, as accumulations of oils, airborne particles and dust may diminish the flame resistance of the fabric.

Customer Related Information

Owner or Purchaser Name: *T.B.D.*
Purchaser P.O Number: *T.B.D.*
Project/Event Name: *T.B.D.*

Order related Information

Sales Order Number: *T.B.D.*
Sales Order Date: *T.B.D.*
Fabric Used: *## Yard (s) [100308] 54" Charisma Velour 25 oz. IFR (Crimson)*

This fabric is at a minimum certified to meet and pass the requirements of the National Fire Protection Association's (NFPA) 701 standards. Additional certification/compliances -if available- listed above.

We hereby certify this to be a true and correct copy of the original "CERTIFICATE OF FLAME RESISTANCE" issued to us by the fabric supplier.

This fabric is certified as IFR only if its composition has not been altered by the addition of substances such as anti-staining coatings, paint, ink, dyes, sizing and adhesives. Any such addition needs its own flame retardant certification and the final composition will need to be certified flame retardant (FR) as well.
